

AUTHORS' INDEX

VOLUME 119

(The numerals indicate the page)

- Abildgaard, C. F. 212.
 Abood, L. G. 625.
 Abramoff, P. 1112.
 Ackermann, W. W. 1015.
 Adams, J. M. 46.
 Adamson, R. H. 456.
 Adashek, K. 1040.
 Adler, R. D. 660.
 Aho, I. 887.
 Aikawa, J. K. 812.
 Ainbender, E. 1166.
 Al-Askari, S. 275.
 Alling, D. W. 1162.
 Allison, F., Jr. 56.
 Alousi, A. A. 301.
 Altura, B. M. 258, 389.
 Anderson, W. A. D. 901.
 Antebi, S. 694.
 Arai, T. 169, 1120.
 Armstrong, D. T. 1136.
 Asano, T. 189.
 Ashley, H. 311.
 Ashworth, C. T. 495.
 Au, W. Y. W. 1048.
 Aulsebrook, K. A. 387.
 Averkin, E. G. 522.
 Azarnoff, D. L. 238.
 Azuma, T. 1232.
 Babino, E. J., Jr. 229.
 Bachner, P. 846.
 Bailey, J. M. 1200.
 Bandyopadhyay, A. 150.
 Baker, B. L. 527.
 Banerjee, C. M. 12, 150, 1081.
 Banks, P. A. 1162.
 Banks, W. F., Jr. 740, 1027.
 Barber, T. X. 1.
 Barnett, C. A. 866.
 Barquet, J. 656.
 Barron, A. L. 377.
 Barski, G. 111.
 Bateman, J. L. 222.
 Baume, P. E. 461.
 Bavetta, L. A. 765.
 Baxter, D. J. 966.
 Beach, V. L. 602.
 Becker, E. L. 652.
 Becker, F. F. 1123.
 Beckman, H. 525.
 Behbehani, A. M. 908, 1158.
 Bekhor, I. J. 765.
 Belehradsk, J., Jr. 111.
 Benner, E. J. 536.
 Berg, B. N. 417.
 Berger, R. 1166.
 Berkovich, S. 690.
 Bernkopf, H. 377.
 Bertles, J. F. 1218.
 Besemer, D. 527.
 Biber, T. U. L. 871.
 Biglieri, E. G. 315.
 Birnie, H. 998.
 Blankenhorn, D. H. 862.
 Bloch, E. 449.
 Blocker, T. G., Jr. 1011.
 Boehni, E. M. 970.
 Bogdonoff, P. D. 1106.
 Bojalil, L. F. 49.
 Bondareff, W. 697.
 Bondy, P. K. 905.
 Borgese, T. A. 1218.
 Bostick, W. L. 206.
 Boulware, R. F. 492.
 Bouroncle, B. A. 958.
 Bowers, C. Y. 208.
 Bowman, B. 248.
 Bowman, R. E. 133.
 Braun, W. 701, 991.
 Breinig, M. K. 1227.
 Brodie, J. L. 536.
 Brooks, J. B. 748.
 Brooks, M. R. 922.
 Brosbe, E. A. 46.
 Brown, D. V. 970.
 Brown, W. E. 778, 783.
 Browning, H. C. 1224.
 Brunish, R. 1064.
 Buck, W. 352.
 Buckley, J. M. 242.
 Burkhalter, A. 512.
 Butler, S. A. 833.
 Butler, W. T. 1169.
 Byrd, C. A. 347.
 Caldarelli, D. 16.
 Calesnick, B. 819.
 Calhoun, B. A. 1089.
 Calick, A. 135.
 Carballeira, A. 751.
 Carlisle, H. N. 838.
 Carroll, K. K. 1086.
 Castle, W. B. 565.
 Castles, T. R. 308.
 Cate, T. R. 1169.
 Chaikoff, I. L. 126.
 Chan, P.-C. 445.
 Chandan, R. C. 384.
 Chauncey, H. H. 1.
 Chien, S. 1155.
 Chlouverakis, C. 775.
 Chow, B. F. 563.
 Clément, G. 590.
 Clough, J. 1200.
 Cohen, A. S. 673.
 Cohen, M. 381.
 Coleman, D. L. 264.
 Collins, G. J., Jr. 164.
 Comerford, F. R. 673.
 Commerford, S. L. 222.
 Condie, R. M. 1030.
 Conway, E. 5.
 Cook, D. L. 1117.
 Cooke, A. R. 1040.
 Cooper, C. W. 81.
 Cooper, P. 449.
 Copenhaver, J. H., Jr. 611.
 Corcos, J. M. 142.
 Couch, J. R. 164.
 Couch, R. B. 1169.
 Cova, R. R. 28.
 Cox, D. C. 1015.
 Craighead, J. E. 408.
 Crain, F. D. 606.
 Crane, W. A. J. 167.
 Creagar, R. 238.
 Creger, C. R. 164.
 Cruz, W. O. 876.
 Curreri, P. W. 1129.
 Czernobilsky, B. 964.
 Dailey, R. E. 71, 306.
 Davé, K. H. 121, 124.
 Davenport, G. R. 925.
 Davies, J. 925.
 Davis, J. R. 611.
 Davis, R. K. 12.
 Dawson, C. R. 722.
 Dawson, P. J. 206.
 Dawson, R. L. 193.
 Dayton, S. 588.
 DeBoer, B. 1221.
 DeBoer, K. O. 1221.
 Dellenback, R. J. 1155.
 Dent, P. B. 869.
 Deringer, M. K. 94.
 De Schryver, C. 961.
 Deupree, R. 1053.
 Dhalla, N. S. 1147.
 Diehl, J. F. 553.
 Dillard, M. 905.
 DiLuzio, N. R. 647.
 Dinka, S. 1015.
 Dishon, T. 991.
 Dixon, G. J. 1141.
 Donati, R. M. 802.
 Dorfman, A. S. 859.
 Dorfman, R. I. 340, 859, 1019.
 Doty, S. B. 77.
 Dubin, I. N. 964.
 Ducanes, T. 956.
 Dudley, M. A. 807.
 Dutta, L. P. 167.
 Easterling, R. E. 948.
 Eaton, M. D. 998.
 Edgren, B. 64.
 Ekwurtzel, J. B. 1069.
 Ellenbogen, L. 565.
 Emmers, R. 271.
 Eskuche, I. 1102.
 Evans, R. J. 934.
 Evans, R. T. 815.
 Fabianek, J. 135.
 Fales, C. H. 688.
 Farnsworth, W. E. 373.
 Farrell, P. M. 28.
 Feller, D. D. 522.
 Fernandes, M. V. 153, 631.
 Fieldsteel, A. H. 206.
 Filkins, J. P. 1181.

- Finegold, M. J. 96.
 Fink, M. A. 186.
 Finlayson, J. S. 663.
 Fisch, L. 719.
 Fisher, B. 61.
 Fisher, E. R. 61.
 Fitch, C. D. 553.
 Fleming, W. W. 255.
 Flynn, E. 476.
 Fogh, H. 233.
 Fogh, J. 233.
 Follis, R. H., Jr. 931.
 Fontenot, R. 1053.
 Forchielli, E. 1019.
 Foster, E. J. 717.
 Fouts, J. R. 1045.
 Fox, J. D. 492.
 Fox, R. R. 229.
 Frankel, H. M. 261.
 Freed, S. C. 773.
 Freeman, L. 618.
 Freeman, R. M. 948.
 Frick, C. A. 327.
 Friedman, R. M. 551.
 Fujimoto, M. M. 487.
 Furth, J. 1211.
 Fuson, R. 833.

SUBJECT INDEX

VOLUME 119

(The numerals indicate the page)

- Acetylcholine**, HC-3. 1037.
renal responses. 887.
- Acid**, amino, alanine, D-cycloserine action. 49.
complexes, active iron transport. 1185.
histidine hyperlipemia. 561.
hydroxyproline, human blood. 622.
mucopolysaccharides. 557.
skin autografts, rat. 794.
lysine inhibition, viral synthesis. 998.
methionine, tryptophan metabolism. 942.
proline, rat liver ribosomes, TZCA. 765.
synthesis, *Streptococcus bovis*. 1097.
thyroid uptake. 334.
tyrosine, thyroidal coupling. 905.
DNA measurement, megakaryocytes study. 1194.
oligodeoxyribonucleotides, antibody formation. 701.
-protein complex, spermatozoa. 769.
fatty, composition, sphingomyelin, lecithin. 862.
essential, deficiency, atherosclerosis. 1035.
free, whole blood clotting time. 588.
isobutyric, alpha-amino-, parathyroid size. 1048.
RNA, manganese. 1089.
secretion, Heidenhain pouch. 473.
p-aminohippuric, kidney slices. 611.
taurine excretion, mongoloids, I.Q. 832.
- Adrenal** cholesterol esters. 71.
excision, catecholamine hyperglycemia. 255.
renal Na, H₂O. 881.
medulla, steroid biogenesis. 751.
steroids, plasma volume. 452.
- Age**, lipoprotein lipase activity. 775.
sex, aortic ruptures, diethylstilbestrol. 509.
thrombosis. 402.
- Alligators**, electroencephalograms. 397.
- Amyloid** induction, phagocytosis. 673.
infiltration, BL mice. 94.
- Anaphylaxis**, challenge time. 688.
reverse passive cutaneous, 7S antibodies. 1073.
- Antibiotic**, actinomycin D, blood pressure. 773.
bone resorption. 614.
calcium. 946.
morphine tolerance. 381.
cephalothin, cephaloridine, *Klebsiella-Aerobacter* resistance. 536.
hematologic response. 731.
polymyxin B. *Vibrio cholerae*. 893.
- Antibody**, anti-B. immune. 854.
anti-insulin. 142.
antirenin, aldosterone secretion. 315.
Coombs' test, azo dyes. 970.
fluorescent, fractionation, gel filtration. 748.
formation, oligodeoxyribonucleotides. 701.
natural, saliva. 815.
production, carrier protein. 311.
responses, heterotypic, adenoviruses. 1162.
7S, RPCA. 1073.
transfer, maternal, mink. 131.
typhus, 19S-7S differentiated, CF test. 291.
- Antigen-antibody** complexes, cellular ingestion. 697.
cell surface, SV40. 896.
challenge time, anaphylaxis. 688.
competition, adjuvant arthritis. 676.
- Aorta**, see **Vascular system**.
- Arthritis**, adjuvant, thymectomy. 676.
- Atherosclerosis**, beta-glucuronidase activity. 1129.
cholesterol. 850.
essential fatty acid deficiency. 1035.
thrombogenesis, rat. 541.
- ATP**, myocardial penetration. 573.
sensitivity, myocardial contractile proteins. 356.
- Autograft**, skin, rat. 557, 794.
- Bacterium**, *Clostridium tetani*, neurotoxin, hemolysin separation. 405.
fungus growth dimetridazole. 164.
Klebsiella-Aerobacter, cephalothin, cephaloridine resistance. 536.
myco-, tuberculosis, NAD synthesis. 807.
myrosinase activity, progoitrin conversion. 360.
Pneumococcus SIII, blood viscosity. 337.
Staphylococcus aureus, alpha toxin production. 74.
constituent, arbovirus inhibition. 1176.
streptococci, group A, L form production. 159.
Streptococcus bovis, amino acid synthesis. 1097.
Vibrio cholerae, polymyxin. 893.
- Bile**, bilirubin, tissue culture. 964. ,
lipids, choline deficiency. 242.
- Blood**, animal species, plasma volume, hematocrit. 1155.
-brain barrier, snake venom. 1030.
ceruloplasmin, copper metabolism. 625.
clearance, *S. typhi*, reticuloendothelial system. 1055.
Coombs' test, azo dyes. 970.
Eperythrozoon, SWIF. 1059.
erythrocytes, glucose utilization, L-T3. 819.
hyperoxia. 833.
survival, portacaval shunt. 1216.
erythropoiesis, polycythemic rats. 445.
erythropoietin formation, hexose analogues inhibition, hypoxic rats. 1150.
gamma irradiation, fasted rats. 1102.
response, nephrectomy. 802.
gas transport chinchilla. 1071.
glucose level, angiotensin. 734.
heat transfer, viscosity. 337.
hemadsorption, anomalous, cell cultures. 180.
immunofluorescence, Friend virus. 1187.
hemoglobin, human serum albumin. 985.
synthesis, embryonic, megaloblastic anemia, duck. 1218.
erythropoietin. 1207.
hemorrhagic disease, rodents. 427.
hemostasis, coagulation, horse. 212.
smooth muscle component. 876.
human, hydroxyproline. 622.

- hypocapnic lacticacidosis, chicken. 261.
leukemia causing filterable agent lymphoma. 1211.
 Friend, drugs. 206.
 L1210, hydroxyurea congeners. 456.
 premalignant, homotransplantation. 869.
leukocyte lysosomes, human. 36.
 sticking reaction. 56.
megakaryocytes study, DNA measurement. 1194.
monocytes, murine protecting substance. 32.
platelets, factors XI, XII. 487.
 permeability factors. 988.
pressure, actinomycin D. 773.
response, oral antibiotics. 731.
thrombosis, laser-induced, inflammation. 1123.
vessels, see **Vascular system**.
volume, alligators, hypothermia. 678.
whole, clotting time. 588.
- Bone**, collagen degradation. 577.
 metabolism. 584.
parathyroid effects. 81.
 citrate, lactate. 88.
plutonium. 77.
resorption, actinomycin D. 614.
- Bradykinin** inhibition. 438.
- Brain**, estrogenic substances stored, Quinestrol. 602.
 hypothalamic extracts, growth hormone release. 208.
 sphingolipids, E.A.E. 42.
- Cadmium**, vascular injury, estrogen. 901.
- Calcium** excretion, vasopressin. 719.
 exogenous, calcey, calciphyllaxis. 24.
 homeostasis, actinomycin-D. 946.
 -phytate zinc interaction. 347.
 transplacental movement. 476.
- Cancer**, heredity, carcinogenic agents. 743.
 safrole, butter yellow toxicity, diet. 1106.
- Carbohydrate** metabolism, glucagon, epinephrine. 1221.
 selection, intake, wild, domesticated rats. 199.
 urinary protein. 193.
- Castration**, testosterone, urine. 1019.
 unilateral, PMS-induced ovulation. 331.
 ventral gland, gerbil. 953.
- Catecholamines**, aortic strip responses. 597.
 hyperglycemia, adrenalectomized rats. 255.
 organs, immunosympathectomized mice. 1232.
 prostate. 373.
 tissue, hypotension. 883.
- Cell** culture, anomalous hemadsorption. 180.
 HeLa, yellow fever virus. 319.
 leukemia virus infection. 186.
 growth response, pituitary. 167.
 HeLa, histone synthesis, poliovirus. 1015.
 ingestion, antigen-antibody complexes. 697.
 injury, cloudy swelling, protein synthesis. 495.
 mast, macrophage ascorbate. 52.
 mitosis control, epidermis. 96.
 phagocytosis, experimental amyloidosis. 673.
 population, mixed, discriminative counting. 728.
 preservation, DMSO. 958.
 stem, hemic, mouse tail. 222.
 surface reactions, malignancy. 481.
- Cholesterol**, atherosclerosis. 850.
 biosynthesis, phenobarbital, liver. 1136.
 blood plasma, diet, menhaden oil. 368.
 esters, adrenal. 71.
 adrenal tumor. 126.
 hypercholesterolemia, nephrosis, rat. 417.
 produced, lipids, plasma, tissue. 150.
 serum, nicotinic acid, nicotinamide effect. 1053.
 triglyceride, nicotinic acid effect. 1117.
 vegetable oil diet, aorta changes. 1081.
- Chromosome**, cellular marker, rat. 370.
 changes, PPLO-infected cells. 233.
- Coccidioidin**, skin sensitivity. 914.
- Collagen** antibodies, fibrillogenesis. 656.
 bovine muscle. 492.
 degradation, bone resorption. 577.
 metabolism, bone. 584.
 estrogen. 364.
- Complement** defective rabbits. 1055.
 dependence, serum toxicity, melanoma cells. 1112.
 fixation test, differentiation 19S-7S typhus antibodies. 291.
- Copper** metabolism, ceruloplasmin. 625.
- Crystal**, micro-, enteric mucosa. 956.
- Diabetes**, alloxan, enzymatic hypoglycemia. 532.
 nicotinic acid. 830.
- Diet**, atherogenesis, thrombogenesis, rat. 541.
 blood cholesterol, menhaden oil. 368.
 copper deficiency ceruloplasmin. 625.
 excess L-histidine, hyperlipemia, monkey. 561.
 low sodium, aldosterone secretion, antirenin. 315.
 methionine, tryptophan metabolism. 942.
 navy beans, morphological changes, rat. 934.
 protein-depletion, sulfhydryl, liver regeneration. 994.
 pyridoxine deficiency, audiogenic seizures. 264.
 safrole, butter yellow toxicity. 1106.
 vegetable oils, cholesterol, aorta changes. 1081.
- Drug**, adrenergic blocking agent, propranolol, competitive antagonism. 350.
 angiotensin, blood glucose level. 734.
 anticoagulant, dicumarol, vitamin K₃. 1093.
 anticonvulsant, diphenylhydantoin, ovulating hormone release. 982.
 antiphlogistic, antiserotonin, aminopyrine. 438.
 anti-tumor, hydroxyurea. 456.
 antiviral, amantadine. 393.
 chloroquine, tissue deposition. 740.
 contraceptive, norethindrone, estrogen-free. 340.
 dimetridazole, bacterial, fungal growth. 164.
 diuretic, oral, isosorbide. 39.
 herpes simplex treatment, MADU. 515.
 hydralazine, SH groups, cupric ion. 100.
 mannitol, renal vascular resistance. 635.
 microsomal, metabolism. 1045.
 phenobarbital, liver, cholesterol biosynthesis. 1136.
 pilocarpine, prostate secretion. 373.
 polypeptide, PLV-2, smooth muscle. 258.
 reserpine, cardiac phosphorylase. 1147.
 vinblastine, lymphoid tissue. 118.
 see also **Antibiotics**, etc., and names of specific drugs.
- Dye**, azo, positive direct Coomb's test. 970.
- Dystrophy**, muscular, free amino acids, chicken. 104.
 plasma protein changes. 28.

- Electroencephalogram**, *Caiman sclerops*. 397.
Electrophysiological data, radio telemetry. 352.
Embryo, retina, pigmentation. 544.
Encephalomyelitis, allergic, brain sphingolipids. 42.
 intracerebral transfer. 267.
Enzyme, aminopeptidase, granulation tissue, scurvy. 628.
 amylase, blood glucose, liver glycogen. 667.
 ATPase, gastric mucosa, frog. 1023.
 myosin A. 738.
 content, human leukocyte lysosomes. 36.
 dehydrogenase, succinic, sweat gland, cystic fibrosis. 470.
 distribution, virus infection, cortisone. 631.
 esterase, ATEE, human serum. 642.
 lipase, lipoprotein, age. 775.
 human placenta. 301.
 wheat germ, tumor cell surface. 481.
 lysosomal, traumatized tissue. 778.
 lysozyme assay. 384.
 myrosinase, bacterial. 360.
 pepsin secretion, gastrin effect. 443.
 phosphorylase, cardiac, reserpine. 1147.
 serum alkaline phosphatase, storage effect. 412.
 specificity, DDD. 238.
 thrombokinase, activities. 804.
 trypsin, chymotrypsin, blood glucose. 866.
Eye, buphthalmia, rabbit, diagnosis. 229.
 herpetic keratitis, MADU treatment. 515.
 retinal pigmentation, oxygen, yolk, chick embryo. 544.
 TRIC infections, immunofluorescence diagnosis. 722.
Factors, clotting, blood platelets. 487.
 intrinsic, releasing, endogenous vitamin B₁₂. 565.
Fat absorption, phosphorylated intermediates. 591.
Feed consumption, rat, alloxan. 400.
 hypophysectomy. 1238.
 tapazole. 174.
Fetus, human, calcification, fluoride effect. 694.
 steroid synthesis, organ culture. 449.
Fibrosis, cystic, nasal mucosa. 458.
 succinic dehydrogenase. 470.
Fluoride, calcification, human fetus. 694.
 tumor growth. 252.
Fungus growth, dimetridazole. 164.
 Saccharomyces cerevisiae, 1,3-BIS-(2-chloroethyl)-1-nitrosourea. 1004.
Gallbladder, oral cholecystographic agents, urinary excretion. 1027.
Gastric mucosa, frog, ATPase. 1023.
 secretion, rat, histamine. 461.
 stimulation, acetate. 473.
Globulin, immuno-, human, poliovirus binding. 1166.
 permeability, heparin. 652.
Glucocorticoids, weight depression. 136.
Glucose, blood, angiotensin. 734.
 proteases. 866.
 hypoglycemia, enzymatic, alloxan-diabetic rats. 532.
 intestinal transport, reserpine. 387.
 uptake, cell proliferation *in vitro*. 1110.
 utilization, L-T3. 819.
Glutamine *in vitro*, stability. 763.
Growth stimulation, chondroitin sulfate A. 618.
Heart, ATP, myocardial penetration. 573.
 bound sodium, potassium, hypertension. 534.
 coronary artery enlargement, hypoxic rat. 717.
 failure, myosin synthesis. 961.
 size, myocardial contractile protein. 356.
Hemagglutination, chicken erythrocytes, psittacosis agent. 377.
Heparin inhibition, permeability globulins. 652.
Histamine, gastric secretion, pylorus ligated rat. 461.
 SRS release. 465.
Homograft, pituitary-ovarian, male mice, luteotropic response. 1224.
 premalignant leukemia. 869.
 response suppression. 248.
Hormone, aldosterone, renal RNA synthesis. 308.
 secretion, antirenin. 315.
 corticotropin metabolism, man. 244.
 cortisone, viral infection. 153, 631.
 diethylstilbestrol, aortic ruptures. 509.
 sex characteristics. 435.
 epinephrine response, liver damage. 708.
 estradiol, albumin-I³¹, skin. 358.
 estrogen activity, norethynodrel, prolactin secretion. 527.
 cadmium injury. 901.
 induced lymphoma, leukemia, RF mice. 1211.
 stimulation, collagen metabolism. 364.
 storage, rat brain. 602.
 gastrin, pepsin secretion. 443.
 growth, releasing activity. 1191.
 factor. 208.
 insulin, anti-, antibodies. 142.
 D-xylose uptake. 306.
 rat lactation. 415.
 alloxan. 1133.
 luteinizing, plasma, cyclic rats. 16.
 pregnancy. 925.
 luteotropic response, pituitary-ovarian isografts, male mice. 1224.
 17-OHCS, stressed infant monkey. 133.
 ovulating, release, diphenylhydantoin. 982.
 parathyroid, serum glycoprotein. 1077.
 PMS-induced ovulation, unilateral castration. 331.
 serotonin, antiphlogistic, SQ 10,643. 438.
 testosterone, urinary excretion. 911.
 castrated men. 1019.
 thyrotropin, amino acids, thyroid uptake. 334.
 triiodothyronine, glucose utilization, erythrocytes. 819.
 -I³¹ uptake, bull spermatozoa. 20.
 vasopressin, calcium, sodium excretion. 719.
 see also **Glucocorticoids**; **Steroids**.
Horse, hemostasis, blood coagulation. 212.
Hydrazine toxicity, nitrogenous substances. 683.
Hydrocarbon, anthracene estimation, gas liquid chromatography. 1086.
 polycyclic, pregnant mice, tumors, offspring. 743.
Hypertension, renal, myocardium, Na, K. 534.
Hypophysis, see **Pituitary**.
Hypotension, tissue catecholamines. 883.
Idiopathic hirsutism, testosterone. 911.

- Immune** response, newborn mice. 991.
- Immunofluorescence** diagnosis, TRIC infections. 722.
- hemadsorption, Friend virus. 1187.
- Immunology**, collagen, tendon fibrillogenesis. 656.
- graft, murine skin, bandaging. 520.
- survivals. 248.
- oligodeoxyribonucleotides. 701.
- RE function. 647.
- tolerance induction, spleen microsomes. 275.
- tumor induction, polyoma virus. 823.
- Inflammation**, acute, leukocytic sticking reaction. 56.
- agents, rats, inhibition. 438.
- exudate, ascites tumor. 111.
- laser-induced thrombosis. 1123.
- nonsteroidal agents, granuloma assay. 859.
- pyrogenic steroids, animals. 108.
- Influenza**, aerosols, monkeys. 838.
- Interferon** induction, tolerance, humoral factor. 1227.
- inhibition, DNA, vaccinia virus. 551.
- partial immunity, influenza virus infection. 790.
- production, viremic chickens. 1234.
- Intestine**, ischemia, vasopressors. 389.
- mucosa, microcrystals. 956.
- triglyceride synthesis. 591.
- potential, sugars. 189.
- transport, glucose, sodium, reserpine effect. 387.
- Iodine** deficiency, experimental psammoma bodies. 931.
- Iron** absorption, kidney. 563.
- transport, amino acid complexes. 1185.
- Isograft**, see **Homograft**.
- Kidney**, acetylcholine. 887.
- aldosterone action. 308.
- damage, ischemia, X-irradiation. 14.
- iron absorption. 563.
- Na, H₂O content, adrenalectomy. 881.
- nephrosis, spontaneous, rat. 417.
- slices, PAH uptake. 611.
- vascular resistance, hypertonic mannitol. 635.
- water reabsorption, PAH secretion. 871.
- Lactation**, rat, insulin. 415.
- alloxan. 1133.
- Lathyrism**, experimental, mucopolysaccharide defect. 322.
- Lipid**, liver synthesis, stress. 522.
- phospho-, lysolecithin, tissue effects. 846.
- sphingomyelin, lecithin fatty acids. 862.
- plasma, tissue, hypercholesteremia. 150.
- sphingo-, brain, E.A.E. 42.
- Liver**, chylomicrons. 64.
- clearance, indocyanine green, beagle. 570.
- cytologic changes, experimental porphyria. 226.
- damage, epinephrine response. 708.
- glycogen, blood glucose, hyperamylasemia. 667.
- glycoprotein, parathyroid extract. 1077.
- indocyanine green plasma clearance, sex, dog. 215.
- lipid synthesis, stress. 522.
- microsomal drug metabolism. 1045.
- mitochondrial swelling, mouse tumor. 759.
- radioactive, ingestion. 996.
- regeneration, sulfhydryl, diet. 994.
- ribosomes, TZCA, proline incorporation. 765.
- Lymph**, lung, oxygen tension. 12.
- Lysin**, hemo-, neurotoxin separation, tetanus. 405.
- Magnesium** metabolism, dinitrophenol. 812.
- Malaria**, avian, *Plasmodium gallinaceum* sporozoites, survival. 525.
- Mammary** growth, suckling stimulus. 501.
- Manganese**, electron paramagnetic resonance, RNA. 1089.
- excess, rats. 966.
- Mongolism**, I.Q., taurine excretion. 832.
- Morphine** tolerance, actinomycin D. 381.
- Mosquito**, *Plasmodium gallinaceum* sporozoites, survival. 525.
- Muscle**, bovine, collagens. 492.
- free amino acids, dystrophic chicks. 104.
- myosin synthesis, heart failure. 961.
- smooth, hemostasis. 876.
- traumatized, biological changes. 778.
- vascular smooth, PLV-2 effect. 258.
- Nerve**, temperature effect, crustaceans. 506.
- Nose**, mucosa, cystic fibrosis. 458.
- secretion, protein, respiratory infection. 1169.
- Organ** culture, human fetal steroid synthesis. 449.
- Ouabain**, beta-adrenergic blockade. 278.
- Ovary**, norethynodrel. 527.
- Ovulation**, metal distribution, avian oviduct. 937.
- PMS-induced, unilateral castration. 331.
- Oxygen**, coronary artery enlargement. 717.
- erythrocyte damage. 833.
- hyperbaric, exposure, effects. 788.
- tension, hemoglobin synthesis. 1207.
- pulmonary, systemic lymph. 12.
- Pancreas** inflammation, rat. 1120.
- secretion, urecholine. 1040.
- Parathyroid** activity, plutonium, bone. 77.
- effects, bone *in vitro*. 81.
- citrate, lactate. 88.
- size, alpha-aminoisobutyric acid. 1048.
- Parotid** fluid, natural bactericidal antibodies. 815.
- phosphate. 948.
- gland, verbal suggestion. 1.
- Phagocytosis**, carbon, plasma factor, rat liver. 1181.
- experimental amyloidosis. 673.
- Phenylketonuria**, unimpaired learning ability, rat. 282.
- Photomicrography**, neuroanatomical techniques, freezing. 271.
- Photosensitivity**, poliovirus. 203.
- Pigment**, eggshell, Japanese quail. 547.
- retinal, chick embryo. 544.
- Pituitary**, cellular response. 167.
- excision, feed intake, rats. 1238.
- Placenta**, calcium movement. 476.
- lipoprotein lipase. 301.
- Plasma** factor, carbon phagocytosis, perfused liver. 1181.
- LH, cyclic rats. 16.
- myco-, PPLO-infected cells, chromosome changes. 233.

- 17-OHCS response, stressed infant monkey. 133.
protein changes, muscular dystrophy. 28.
volume, adrenal steroids. 452.
- Plutonium**, bone. 77.
- Polysaccharide**, muco-, acid, rat tissue. 1064.
defect experimental lathyrism. 322.
hydroxyproline. 557.
-protein complexes. 327.
- Porphyria**, experimental, cytologic changes, liver. 226.
- PPLO**, see **Plasma**, myco-, (PPLO).
- Pregnancy**, connective tissue permeability. 135.
luteinizing hormone. 925.
- Prostate** secretion regulation. 373.
- Protein**, basic, monocylin, protecting substance. 32.
carrier, antibody production. 311.
-DNA, mammalian spermatozoa. 769.
inherited serum group specific, electrophoresis. 1153.
metabolism, glucagon, epinephrine. 1221.
myocardial contractile, ATP sensitivity. 356.
myosin A, urea, organic solvents. 738.
synthesis, chronic heart failure. 961.
polysaccharide complexes. 327.
synthesis, hepatic cell injury. 495.
urinary, carbohydrate. 193.
molecular size. 663.
- Psittacosis** agent, hemagglutination, chicken erythrocytes. 377.
- Pyrogen**, endogenous, endotoxin tolerance. 218.
leucocytic, intracisternal injection. 660.
- Radiation** damage, life expectancy. 922.
- Radio** telemetry transmitter. 352.
- Radioactive** liver ingestion. 996.
- Radiobiology**, tissue, maternal, fetal. 148.
- Rat**, feed consumption mortality, alloxan. 400.
wild, domesticated, carbohydrates. 199.
- Reserpine**, intestinal transport, glucose, sodium. 387.
- Reticuloendothelial** function, red cell immune response. 647.
system, amyloidosis. 673.
blood clearance, *S. typhi*. 1055.
- Rickettsia tsutsugamushi**, reinfection. 736.
- Scurvy**, granulation tissue aminopeptidase. 628.
- Serum** albumin, hemoglobins. 985.
ATEe esterase. 642.
beta-glucuronidase activity, various species. 1129.
human, lecithin, sphingomyelin fatty acids. 862.
neutralization, mouse leukemia virus. 420.
- Sex**, age, aortic ruptures, diethylstilbestrol. 509.
characteristics, diethylstilbestrol, turkeys. 435.
ICG clearance, dog. 215.
stress reactivity, infantile experience. 757.
- Shock**, electro-, chick embryo. 512.
vasopressor influence. 389.
- Shunt**, portacaval, erythrocyte survival. 1216.
- Shwartzman** reaction, generalized, particle retention, glomerular capillaries. 1139.
- Skin**, acid mucopolysaccharides, rat. 1064.
albumin- I^{131} , estradiol. 358.
epidermis, mitosis control. 96.
grafting, autologous, rat. 557, 794.
immunology. 520.
rat, leukemogenesis. 869.
sensitivity, coccidioidin induction. 914.
- Spermatozoa**, bull, T_8 - I^{131} uptake. 20.
DNA-protein complex. 769.
- Spinal** cord, convulsions, chick embryos. 512.
- Spleen** microsomes, tolerance induction. 275.
weight increase factor, Eperythrozoon. 1059.
- Steroid**, adrenal, plasma volume. 452.
biogenesis, adrenal medulla. 751.
norethindrone, estrogen-free. 340.
pyrogenic, inflammation. 108.
synthesis, fetal organ culture. 449.
- Stress**, liver lipid synthesis. 522.
plasma 17-OHCS response. 133.
reactivity, infantile experience. 757.
- Sugar**, intestinal potential, rodent. 189.
xylose, D-, uptake, insulin. 306.
- Sulphydryl**, liver regeneration. 994.
- Teratogenesis**, vitamin E deficiency. 1069.
- Thymus**, adjuvant arthritis. 676.
glucocorticoids, thymolytic potency. 136.
wound healing. 61.
- Thyroid** coupling, tyrosine *in vitro*. 905.
effect, methimazole-tapazole. 174.
experimental psammoma bodies. 931.
lobe, iodothyronine, iodotyrosine formation. 670.
radio excision, larval trout. 1205.
uptake, amino acids. 334.
- Tissue** catecholamines, hypotension. 883.
connective, permeability, pregnancy. 135.
culture, adipose tissue. 44.
amantadine HCl, antiviral. 393.
bilirubin, fibroblasts, liver cells. 964.
chemical medium, embryonic cartilage, bone. 287.
chondroitin sulfate A, growth stimulation. 618.
discriminative cell counting. 728.
glucose uptake. 1110.
human aorta, rhinoviruses. 843.
Jensen sarcoma. 5.
kidney, adenovirus, cytopathic effects. 975.
marmoset kidney cells, virus. 950.
PPLO-infected cells, chromosome changes. 233.
tonsillar lymphocytes. 593.
effects, lysolecithin. 846.
lymphoid, vinblastine. 118.
mammalian, acetylcholine. 1037.
maternal, fetal, ^{90}Zr , ^{90}Nb . 148.
traumatized, lysosomal enzymes. 778.
- Tonsil** culture, lymphocytes. 593.
- Toxin**, alpha, production *in vivo*. 74.
endo-, papain-treated, reactivation. 115.
tolerance, endogenous pyrogen. 218.
toxic proteins. 1030.
neuro-, tetanus. 405.
- Tuberculosis** prevention, guinea pigs. 46.
- Tumor**, adrenal cortical, cholesterol esters. 126.
anthracene estimation, mammary tissue, rat. 1086.
anti-, activity, advanced leukemia L1210, hydroxyurea congeners. 456.
ascites, inflammatory exudate. 111.
LDH viruses. 1200.
cells, mast, ascorbic acid. 52.
surface reactions. 481.
descendant, DMBA treated mothers. 743.

- granuloma assay, nonsteroidal agents. 859.
growth, fluoride. 252.
induction, immunologic competence. 823.
liver mitochondrial swelling. 759.
lymphoma 6C3HED cells, asparagine metabolism. 325.
thymic, leukemogenic filterable agent. 1211.
lymphosarcoma, vinblastine. 118.
melanoma S91 cells, complement dependence, serum toxicity. 1112.
psammoma bodies, experimental. 931.
sarcoma, Jensen, guinea pig serum *in vitro*. 5.
- Ulcer**, acid pepsin, alkaline trypsin interchange. 169.
- Urea** diuresis, water reabsorption, PAH secretion. 871.
hydroxy-, congeners, advanced leukemia L1210. 456.
mesoalyl, alloxan, feed consumption, mortality, rat. 400.
- Urine** excretion, oral cholecystographic agents. 1027.
human, carbohydrate-protein complexes. 193.
protein, rat, molecular size. 663.
testosterone excretion, idiopathic hirsutism. 911.
- Vascular** injury, cadmium, estrogen. 901.
system, aorta changes, vegetable oils, cholesterol. 1081.
aortic thrombosis, age. 402.
catecholamines, aortic strip response. 597.
coronary artery enlargement, hypoxic rat. 717.
renal, hypertonic mannitol. 635.
thrombogenesis, rat. 541.
- Venom**, ant. 344.
snake, blood-brain barrier. 1030.
- Virus**, adeno-, cytopathic effects. 975.
heterotypic antibody responses. 1162.
anti-, activity, amantadine HCl. 393.
arbo-, inhibition, staphylococcus constituent. 1176.
chikungunya, hemorrhagic disease, rodents. 427.
Coxsackie B1, gonadectomy. 690.
ECHO, antigenic relationships. 1158.
types 29, 32, antigenic relation. 908.
encephalomyocarditis, COL SK, Mengo. 408.
-free infective centers, poliovirus inactivation. 203.
Friend, hemadsorption, immunofluorescence. 1187.
leukemia, drugs. 206.
host weight loss. 1141.
H-1, purification. 918.
viremia, adult hamster. 715.
human. 711.
- herpes simplex, MADU treatment. 515.
multiplication, pH. 1021.
infection, cortisone. 153.
influenza, aerosols, monkeys. 838.
infection, partial immunity, interferon. 790.
lysine inhibition. 998.
Junin, infection, immunization. 608.
LDH, tumor growth. 1200.
leukemia, infected cell culture. 186.
mouse, serum neutralization. 420.
polio-, attenuated, blowflies. 121.
binding, human immunoglobulins. 1166.
cortisone, enzyme distribution. 631.
histone synthesis, HeLa cell. 1015.
survival, cockroaches. 124.
polyoma, tumor induction, immunology. 823.
Powassan, interferon production. 1234.
New York State. 432.
respiratory, infection, protein, nasal secretion. 1169.
rhino-, human aorta cells. 843.
serotypes. 798.
susceptibility, marmoset kidney cell cultures. 950.
SV40, cell surface antigens. 896.
tolerance, interferon induction. 1227.
TRIC infection, immunofluorescence diagnosis. 722.
vaccinia, interferon inhibition, DNA. 551.
mononucleotide inhibition. 9.
yellow fever, HeLa cells. 319.
- Vitamin** B complex, choline deficiency, bile lipids. 242.
nicotinic acid, diabetic dogs. 830.
effect, serum cholesterol. 1053.
serum triglyceride cholesterol. 1117.
B₆ deficiency, audiogenic seizures. 264.
tissue zinc content. 177.
B₁₂, releasing factor. 565.
C, chloroquine tissue deposition. 740.
normal, neoplastic mast cells. 52.
E deficiency, rabbit, 1-alpha-tocopherol metabolism. 553.
teratogenesis. 1069.
K₁, K₃, dicumarol antagonism. 1093.
pro-, beta carotene, metabolism. 606.
- Weight** depression, glucocorticoids. 136.
- Wound** healing, cell multiplication, epidermis. 96.
Krebs cycle, granulation. 1011.
thymus. 61.
hemostasis, smooth muscle. 876.
- X-Irradiation**, ischemia renal damage. 14.
shielding, mouse tail, hemic stem cells. 222.
- Zinc**-calcium-phytate interaction. 347.
content, tissues, pyridoxine deficiency. 177.

Friends of the Society

Our members are requested to note the following list of Friends. We wish to express our thanks to each of them. Their contributions help materially in meeting the very sharp increase in costs of publication.

SUGGESTIONS TO AUTHORS

1. When manuscript is submitted it is assumed that *no other*, based on the same research, has been published previously, nor will be published simultaneously.
2. a. Manuscripts should be as *concise* as possible, yet *sufficiently* detailed to permit critical appraisal.
b. Manuscripts should be *double* or *triple* spaced.
3. Manuscripts of *non-experimental* researches, or those with *inadequate controls* are not acceptable.
4. *Unnecessary subdivision* of a research into several manuscripts is not acceptable.
5. a. Manuscripts devoted to *improvement of procedure or of apparatus* may be accepted when a new principle is involved or when decidedly superior biological results are obtained. Evidence of such superiority should be given.
b. *Confirmatory* or *negative* reports may be accepted only when they are of obvious biological significance.
6. Length of manuscripts averages 3 printed pages, including tables, charts, bibliography. Beyond this length, to 10 printed pages only by approval of Editors.
7. *Title* limited to 15 words.
8. *Conclusions* should be based upon the experimental data submitted.
9. a. *Illustrations*. Descriptive matter should not extend beyond the curves. Avoid large blank spaces.
b. Explanations and numbers should be legible after reduction of Figure to one column.
c. Drawings should be on white or blue tracing paper. Figures and drawings should be in black India ink, not typewritten.
d. Half-tone Figures should be sharply contrasted, on white glossy paper.
e. Illustrations larger than manuscript should be accompanied by smaller photograph.
f. Illustrations should be grouped to fit printed page.
10. *Tables* should have concise heading, should be as simple as possible, and arranged preferably for vertical position for single or double column. For identical values use ditto marks, for similar phrases use "idem."
11. a. Only essential *citations* should be submitted, and arranged numerically at end of manuscript.
b. Reduce number of citations by reference to recent reviews.
c. "Personal communication," "unpublished," numerous abstracts should be excluded from bibliography. If manuscript has been accepted for publication, include it in bibliography, giving journal, year, etc. If *not accepted do not include it* in bibliography.
12. *Duplication* of table, graph and text is not acceptable.
13. *Trade* or *popular name* or *abbreviation* of a chemical may be used only when preceded by chemical or scientific name. Thereafter any of these names or abbreviations may be used. Trade name should begin with a capital letter.
14. *Structural formulae* of chemicals should be reduced to absolute minimum.
15. The Proceedings is copyrighted.
16. a. Authors are expected to discourage circulation of reprints for commercial purposes.
b. *Reprints* are limited to 1300.
17. Changes in *galley proof* should be absolutely minimal. Excessive changes are charged. Galley proof of non-member's article is sent to sponsor.
18. *Sponsor* is held responsible for non-member's manuscript. Sponsor should write stating (a) how familiar he is with the author and his research, (b) whether author is scientifically reliable, (c) that manuscript conforms to "Suggestions to Authors," (d) that he has *critically* examined the manuscript, (e) wherein the manuscript is a significant contribution to science, and (f) that he assumes financial responsibility involved. Sponsor should be in the same laboratory or recent past laboratory as the author. Where not of the same or recent past laboratory, he should specify why such letter comes from a member at another laboratory.

Notify the General Secretary at least one month *before change of address*.
Editorial office is closed during August.
